

# **DELAWARE NURSING HOME UTILIZATION STATISTICS**

**January – December 2014**

**Delaware Health Care Commission  
410 Federal Street  
Dover, DE 19901**

**April 2016**

## EXECUTIVE SUMMARY

In 2014, 47 Delaware nursing homes operated a total of 4,960 licensed beds across the state. Forty-four of these facilities were private nursing homes, accounting for 92 percent of all licensed nursing home beds in Delaware. Delaware's three publicly-operated nursing home facilities (Emily P. Bissell Hospital, Governor Bacon Health Center, and the Delaware Hospital for the Chronically Ill) accounted for the remaining 8 percent of statewide nursing home beds.

Since 2004, overall occupancy rates for private nursing homes in all three Delaware counties have hovered near 90 percent. The annual number of admissions to private Delaware nursing homes has steadily increased since 2004; however, increases in the number of admitted patients have been most dramatic in Kent and Sussex Counties. From 2004-2014, the annual number of admissions to private nursing homes in Kent and Sussex Counties increased 179.3 percent and 99.1 percent, respectively. Over the same time period, the annual number of admissions to private nursing homes in New Castle County increased 25.5 percent. While private nursing home admissions have steadily increased across all three counties, annual admissions to public nursing homes in Delaware have been more erratic. Since 2004, public nursing homes in Delaware have experienced substantial fluctuations in the number of patients admitted each year.

In 2014, a total of 12,575 patients were admitted to Delaware nursing homes. Of this total, white patients accounted for nearly 82 percent of all admissions. Black patients and patients of other races accounted for 16.6 percent and 1.6 percent of 2014 nursing home admissions, respectively. Compared to their white counterparts, black patients and patients of other races admitted to Delaware nursing homes are younger on average. Similar demographic trends are observed for discharges from Delaware nursing homes.

Payment source varies by facility type. The overwhelming majority (83.4 percent) of patients in public Delaware nursing homes used Medicaid as a source of payment in 2014; among patients in private nursing homes, 57 percent used Medicaid. Although the percentage of private nursing home patients using Medicare has increased slowly since 2004, Medicare is still not a major payer of nursing home care in Delaware. In 2014, 19.0 percent of private nursing home patients and 0.5 percent of public nursing home patients used Medicare as their source of payment.

The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization. Between 2010 and 2040, Delaware's total population is expected to increase 19.4 percent. Projected population growth is much more dramatic among older Delawareans. From 2010 to 2040, the statewide population of Delawareans age 65 and older is expected to increase 98.7 percent (nearly doubling from 130,134 to 258,540).

## **ACKNOWLEDGEMENTS**

This report was funded by the Delaware Health and Social Services, Health Care Commission. This report is the product of collaborative support from the Delaware Health Care Facilities Association, the Division of Services for Aging and Adults with Physical Disabilities and all nursing home facilities across Delaware. The Health Care Commission wishes to thank these stakeholders and other subject matter experts who provided background information, analysis, and feedback to inform the development of this report.

## I. INTRODUCTION

This, the 28<sup>th</sup> edition of the Delaware Nursing Home Utilization Statistical Report, summarizes 2014 data submitted by Delaware nursing homes<sup>1</sup>. On a monthly basis, from January through December 2014, Delaware nursing homes submitted utilization data to the Delaware Health Care Commission (DHCC). To accomplish this, the DHCC contacted facilities on the first day of each month via e-mail; follow-up contact was made via fax and phone if a facility's monthly data submission was delayed. Upon initial data submission, the DHCC converted the data to an electronic format and reviewed each facility's report for internal inconsistencies and unexpected changes in reported statistics. Any discrepancies were immediately communicated back to the facility with a request for updated data. After receipt of updated data, that facility's report was considered complete for the month. At the end of the reporting year, the DHCC recoded and tabulated data to yield annual totals by facility.

This report presents Delaware nursing home data in two sections. The **Facility Characteristics** section highlights trend data from 2004 through 2014. The majority of data presented in this section are aggregated to the state- and county-level, and primarily focus on indicators of utilization and patient demographics. The **Tables** section presents detailed facility-level measures, including total patient days, occupancy rates, percentage of patients by source of payment, and annual admission and discharge totals. Note that percentages in any given data category may not sum to 100 percent due to numerical rounding. Refer to Appendix A for changes in facilities' names and/or number of licensed beds that occurred in 2014.

---

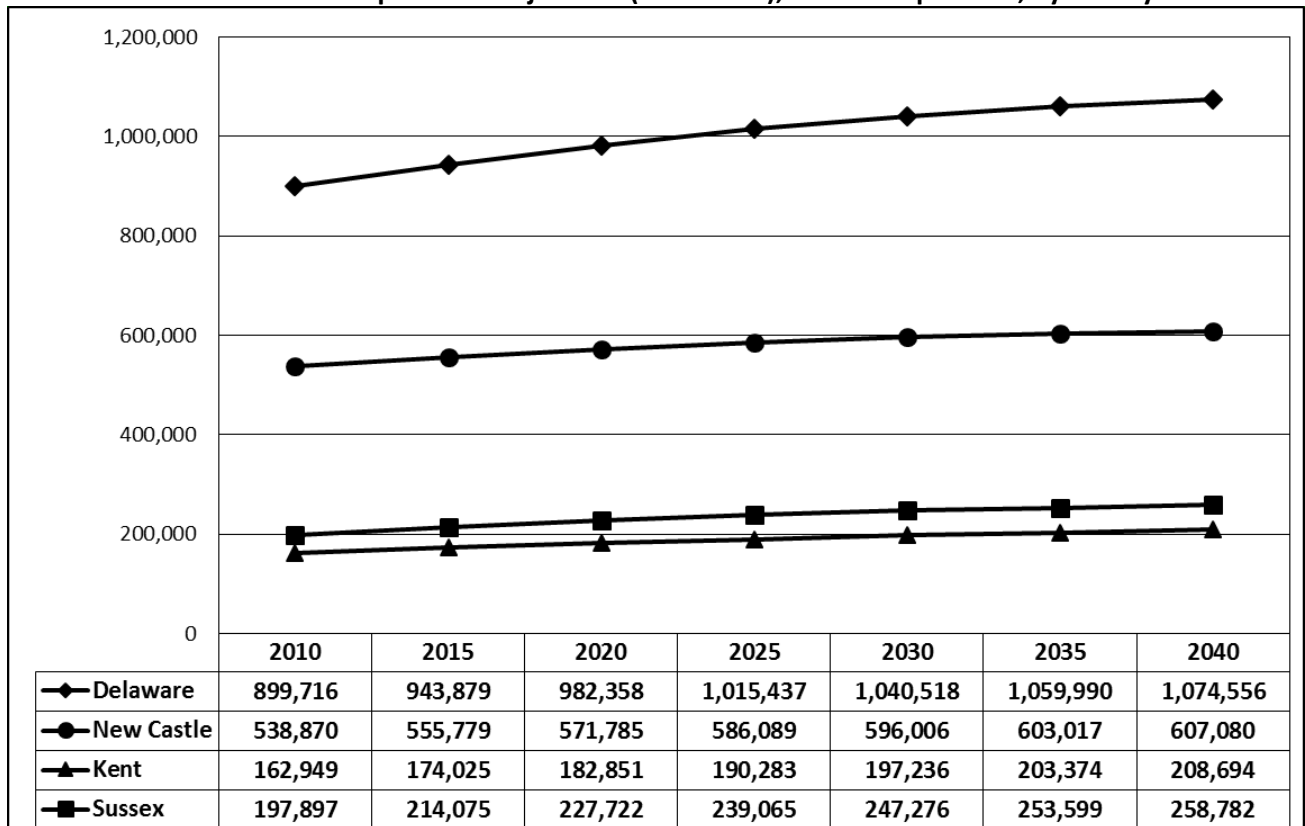

<sup>1</sup> Excluded from this report are facilities that serve individuals under the age of 18 as well as Intermediate Care Facilities for Individuals with Intellectual Developmental Disabilities (ICF/IID). ICF/IID facilities provide active and comprehensive and individualized treatment and rehabilitation services to promote functional status and independence.

## **STATEWIDE POPULATION PROJECTIONS**

The growing size and the changing demographics of Delaware's population are central to the understanding of the distribution of nursing homes, the number of licensed nursing home beds, and their utilization. The following two charts, derived from Delaware Population Consortium data, provide the context within which to evaluate the availability of facilities for the elderly. Chart 1 shows the projected increase of Delaware's total population from 2010 to 2040. Chart 2 shows the projected population increase over the same time period specifically among Delawareans age 65 and older.

Between 2010 and 2040, Delaware's total population is expected to increase 19.4 percent. Overall population growth is distributed unevenly across Delaware's counties; from 2010-2040, Kent and Sussex Counties are expected to experience a 28.1 percent and 30.8 percent increase in total population, respectively. Total population growth for New Castle County is estimated at 12.7 percent over the same time period. Projected population growth is much more dramatic among older Delawareans. From 2010 to 2040, the statewide population of Delawareans age 65 and older is expected to increase 98.7 percent (nearly doubling from 130,134 to 258,540). Among this subpopulation, cohorts of the oldest Delawareans are expected to increase most rapidly in size. Between 2010 and 2040, statewide percentages of residents age 75-79, 80-84, and 85+ are projected to increase 120.6 percent, 143.8 percent, and 203.2 percent, respectively.

## II. FACILITY CHARACTERISTICS

### NUMBER OF NURSING HOME BEDS

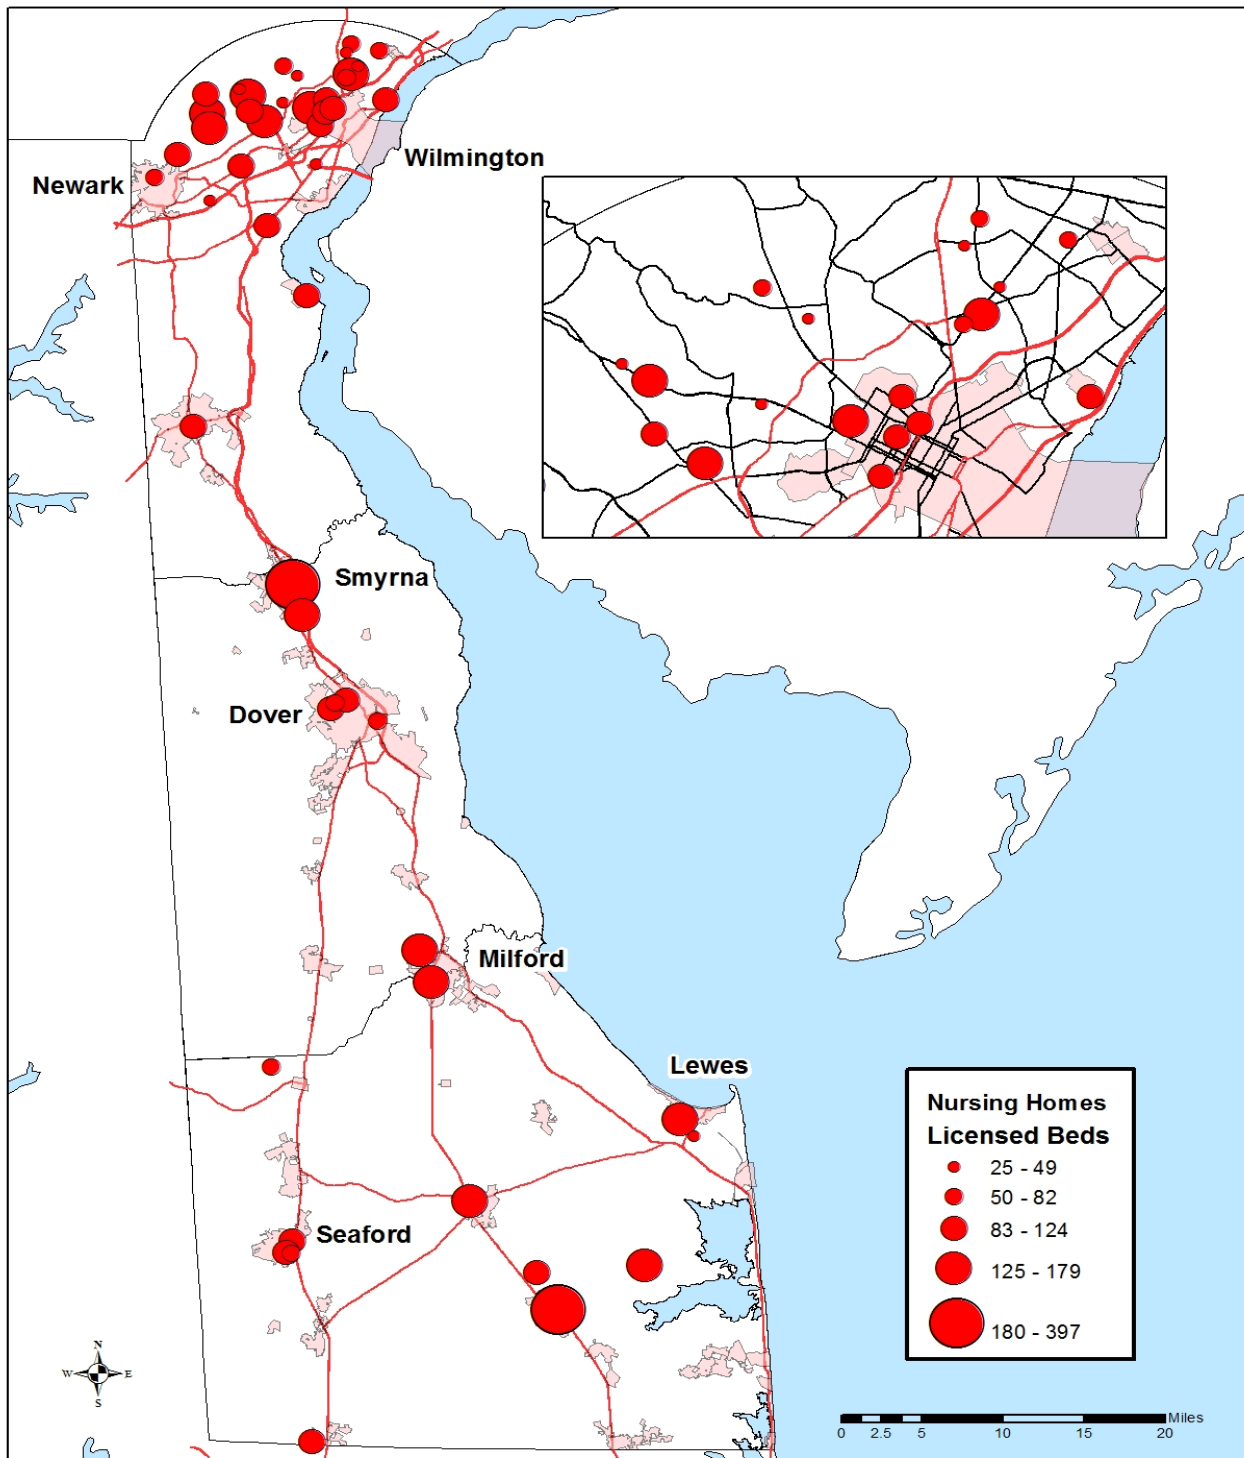

In 2014, 47 Delaware nursing homes operated a total of 4,960 licensed beds. The majority of Delaware nursing homes – 44 out of 47 – were privately owned and operated in 2014. Privately-owned licensed beds accounted for 92.5 percent of all licensed nursing home beds in Delaware. Delaware’s three publicly-operated nursing home facilities (Emily P. Bissell Hospital, Governor Bacon Health Center, and the Delaware Hospital for the Chronically Ill) accounted for the remaining 7.5 percent of statewide nursing home beds.

**Table 1: Delaware Nursing Home Beds, by County and Facility Type, 2004-2014**

Year	Private Facilities								Public Facilities		All Facilities	
	New Castle County		Kent County		Sussex County		Total Private

2014	27	2,649	6	672	11	1,264	44	4,585	3	375	47	4,960
2004-2014 % Change		10.4%		29.0%		11.6%		13.1%		-42.6%		5.4%

The map on the following page shows the geographic location of Delaware nursing homes. Each circular symbol represents one nursing home. The size of the circular symbol corresponds to the number of licensed beds at that facility. New Castle County is home to 27 private nursing homes and two public nursing homes. Kent County houses six private nursing homes and one public nursing home. The remaining 11 private nursing homes are located in Sussex County.

**Figure 1: Delaware Nursing Homes and Number of Licensed Beds**

## UTILIZATION

A commonly-used measure of nursing home utilization is the number of billable patient days

generated by a facility over a given time period. A billable patient day represents a unit of time (i.e., one day) during which the facility's services are used by one patient. For example, if a nursing home has 100 patients on a particular day, the facility has generated 100 billable patient days for that particular 24-hour period. If a facility's number of billable patient days increases from one time period to the next, it is an indication that the facility is caring for more patients, caring for patients for longer periods of time, or a combination of these two factors. Mathematically, billable patient days per facility per year are calculated by summing each facility's monthly billable patient days over a 12-month period.

Long-term trends reveal sizeable shifts in the number of patient days by county and facility type. From 2004-2014, New Castle County and Sussex County private nursing homes experienced a 6.7 percent and 9.7 percent increase in billable patient days, respectively. During the same time period, private nursing homes in Kent County experienced a substantially larger 26.4 percent increase in billable patient days. From 2004 to 2014, billable patient days among Delaware's public nursing homes declined 33.8 percent.

**Table 2: Number of Billable Patient Days Utilized by Year, Facility Type, and County, 2004-2014**

Year	Private Facilities				Public Facilities	All Facilities
	New Castle County	Kent County	Sussex County	Total Private		
2004	816,613	177,472	382,253	1,376,338	132,603	1,508,941
2005	800,955	176,226	367,391	1,344,572	135,622	1,480,194
2006	809,733	175,027	373,221	1,357,981	144,357	1,502,338
2007	830,921	179,315	371,520	1,381,756	142,893	1,524,649
2008	833,344	208,235	387,715	1,429,294	143,640	1,572,934
2009	824,262	219,019	404,234	1,447,515	137,584	1,585,099

2014	871,456	224,370	419,167	1,514,993	87,792	1,602,785
2004-2014 % Change	6.7%	26.4%	9.7%	9.8%	-33.8%	6.2%

## OCCUPANCY

Occupancy rates are helpful for putting facilities' utilization data within the context of available resources. A facility's occupancy rate reflects the percentage of available beds occupied by patients throughout the reporting year. Occupancy rates are weighted based on the number of days a facility was open during the reporting year. Mathematically, for facilities that were open 365 days of the reporting year,

**Weighted Occupancy Rate** = [(Number of Billable Patient Days) / (Number of Licensed Bed Days)] \* 100%

where (Number of Licensed Bed Days) equals the number of licensed beds in a facility (as of December of the reporting year) multiplied by 365. If a facility was open fewer than 365 days of the reporting year, the same weighted occupancy formula is used with the exception that (Number of Licensed Bed Days) equals the number of licensed beds multiplied by the actual number of days the facility was open.

Since 2004, overall occupancy rates for private facilities in all three counties have hovered near 90 percent. Over the past 10 years, Delaware's public nursing homes have operated at 64 percent occupancy or less. From 2004 to 2014, the overall occupancy rate for private facilities fluctuated only slightly (ranging from a 1.5 percent decline in Sussex County to a 3.1 percent decline in New Castle County). During the same time period, occupancy rates in Delaware's three public facilities increased 8.5 percent; however, this reflects a reduction in licensed public nursing home beds rather than an increase in admissions to public nursing homes (see Table 4 for additional details).

**Table 3: Weighted Occupancy Rates, 2004-2014, by Facility Type and County**

Year	Private Facilities				Public Facilities	All Facilities
	New Castle County	Kent County	Sussex County	Total Private		
<b>2004</b>	93.2%	93.3%	92.4%	93.0%	55.6%	87.8%

## ADMISSIONS

The annual number of admissions to private Delaware nursing homes has steadily increased since 2004; however, increases in the number of admitted patients have been most dramatic in Kent and Sussex Counties. From 2004-2014, the annual number of admissions to private nursing homes in Kent and Sussex Counties increased 179.3 percent and 99.1 percent, respectively. Over the same time period, the annual

number of admissions to private nursing homes in New Castle County increased 25.5 percent. While private nursing home admissions have steadily increased across all three counties, annual admissions to public nursing homes in Delaware have been more erratic. Since 2004, public nursing homes in Delaware have experienced substantial fluctuations in the number of patients admitted each year. Considering the most recent 11 years' worth of data, the peak number of public nursing home admissions occurred in 2006 when 156 patients were admitted to Delaware's three public nursing homes. In 2014, this number fell to just 50 patients. Compared to 2004, 26.5 percent fewer patients were admitted to Delaware public nursing homes in 2014.

**Table 4: Total Number of Nursing Home Admissions, 2004-2014, by Facility Type and County**

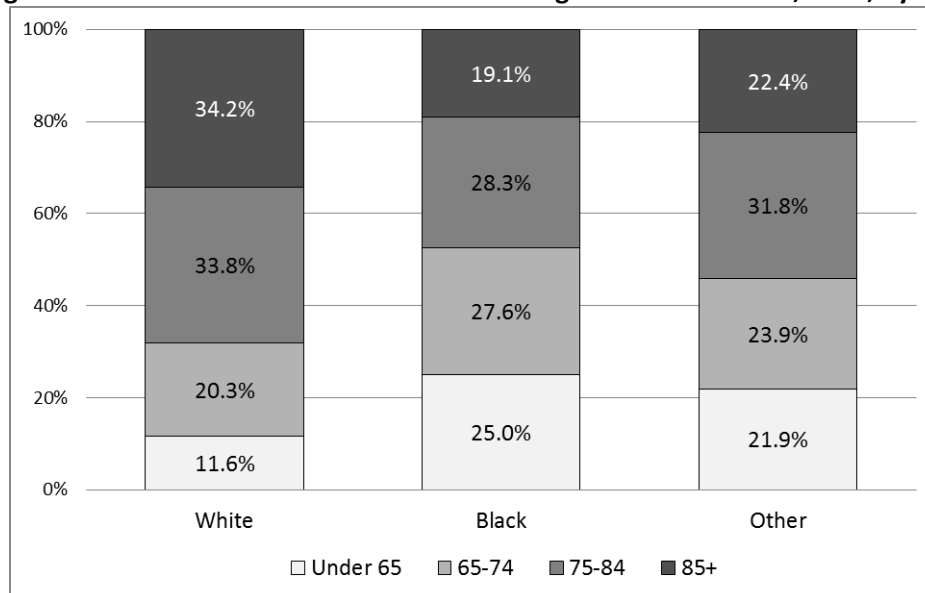

Year	Private Facilities				Public Facilities	All Facilities
	New Castle County	Kent County	Sussex County	Total Private		
2004	5,442	618	2,001	8,061	68	8,129
2005	5,652	870	2,250	8,772	145	8,917
2006	5,358	755	2,246	8,359	156	8,515
2007	5,709	954	2,279	8,942	113	9,055
2008	5,835	1,066	3,242	10,143	126	10,269
2009	5,928	1,164	3,088	10,180	90	10,270
2010	6,406	1,353	3,247	11,006	119	11,125
2011	6,654	1,493	3,563	11,710	65	11,775
2012	6,566	1,696	3,477	11,739	31	11,770
2013	6,962	1,697	3,513	12,172	39	12,211
2014	6,816	1,726	3,983	12,525	50	12,575
2004-2014 % Change	25.5%	179.3%	99.1%	55.4%	-26.5%	54.7%

As shown in Table 5, white patients accounted for nearly 82 percent of all Delaware nursing home admissions in 2014. Black patients and patients of other races accounted for 16.6 percent and 1.6 percent of 2014 nursing home admissions, respectively. When considering admissions by age, individuals 75-84 years and 85 years and over accounted for 32.9 percent and 31.5 percent, respectively, of all 2014 Delaware nursing home admissions. Just over one-fifth (21.6 percent) of 2014 nursing home admissions were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for the remaining 14.0 percent of 2014 admissions.

**Table 5: Percentage of Total Delaware Nursing Home Admissions, by Race and Age, 2014**

	Age Groups				
	Under 65	65-74	75-84	85+	Total Admissions (by Race)
<b>White Admissions</b>	11.6%	20.3%	33.8%	34.2%	<b>81.8%</b>
<b>Black Admissions</b>	25.0%	27.6%	28.3%	19.1%	<b>16.6%</b>
<b>Other Admissions</b>	21.9%	23.9%	31.8%	22.4%	<b>1.6%</b>
<b>Total Admissions (by Age)</b>	<b>14.0%</b>	<b>21.6%</b>	<b>32.9%</b>	<b>31.5%</b>	<b>100.0%</b>

Although black patients and patients of other races comprised just 18 percent of all 2014 nursing home admissions combined, they represent an overall younger population compared to their white counterparts. As shown in Figure 2, in 2014, fewer than 12 percent of all white nursing home admissions were individuals under the age of 65. Relative to this, individuals under the age of 65 accounted for 25.0 percent and 21.9 percent of black admissions and admissions of other races, respectively. Among black patients admitted to Delaware nursing homes in 2014, nearly 53 percent were individuals age 74 and under; in comparison, 32 percent of all white admissions represented individuals under the age of 74. In summary, while white patients accounted for substantially more nursing home admissions overall, black patients and patients of other races tended to be younger when they admitted to Delaware nursing homes.

**Figure 2: Racial Breakdown of Delaware Nursing Home Admissions, 2014, by Age**

## DISCHARGES

In 2014, Delaware nursing homes discharged a total of 12,130 patients. Since 2004, the annual number of discharges from private Delaware nursing homes has substantially increased across all three counties. From 2004-2014, Kent and Sussex Counties experienced the greatest increase in the number of annual private nursing home discharges (171.3 percent and 90.8 percent, respectively). Private nursing home discharges increased 21.6 percent in New Castle County over the same time period. Compared to 2004, Delaware's public nursing homes experienced a 21.9 percent decline in the number of annual discharges; however, this decline in the number of discharges mirrors a similar decline in the number of annual admissions among Delaware's public nursing homes.

**Table 6: Total Number of Nursing Home Discharges, 2004-2014, by Facility Type and County**

Year	Private Facilities				Public Facilities	All Facilities
	New Castle County	Kent County	Sussex County	Total Private		
2004	5,438	582	2,024	8,044	96	8,140
2005	5,542	788	2,253	8,583	123	8,706
2006	5,398	689	2,198	8,285	133	8,418
2007	5,690	764	2,241	8,695	138	8,833
2008	5,706	934	3,152	9,792	127	9,919
2009	5,659	1,114	3,129	9,902	104	10,006

As in previous years, in 2014, discharge destination varied greatly by facility type (Table 7). Patients discharged from private facilities were far more likely to return home compared to patients discharged from public facilities (61.5 percent vs. 12.0 percent, respectively). Sixty percent of patients discharged from public nursing home facilities represented discharges due to death. Among discharges from private nursing homes, just fewer than 10 percent represented discharges due to death.

**Table 7: Percentage of 2014 Nursing Home Discharges, by Discharge Destination**

	Discharge Destination						
Facility Type	Home	Hospital	Assisted Living	Private LTCF	State Owned LTCF	Death	Other
<b>Private (N=12,055)</b>	61.5%	22.5%	2.7%	2.3%	0.4%	9.3%	1.1%
<b>Public (N=75)</b>	12.0%	5.3%	1.3%	4.0%	12.0%	60.0%	5.3%
<b>All facilities (N=12,130)</b>	<b>61.2%</b>	<b>22.4%</b>	<b>2.7%</b>	<b>2.3%</b>	<b>0.5%</b>	<b>9.7%</b>	<b>1.1%</b>

As shown in Table 8, 2014 discharge statistics mirror admission statistics in terms of patient race and age. White patients accounted for 81.8 percent of all Delaware nursing home discharges in 2014. Black patients and patients of other races accounted for 16.7 percent and 1.5 percent of 2014 nursing home discharges, respectively. When considering discharges by age category, individuals 75-84 years and 85 years and over accounted for 32.5 percent and 32.9 percent, respectively, of all Delaware nursing home discharges. Just over one-fifth (20.4 percent) of 2014 nursing home discharges were individuals ages 65-74. The youngest category of nursing home patients – those under age 65 – accounted for the remaining 14.3 percent of 2014 discharges.

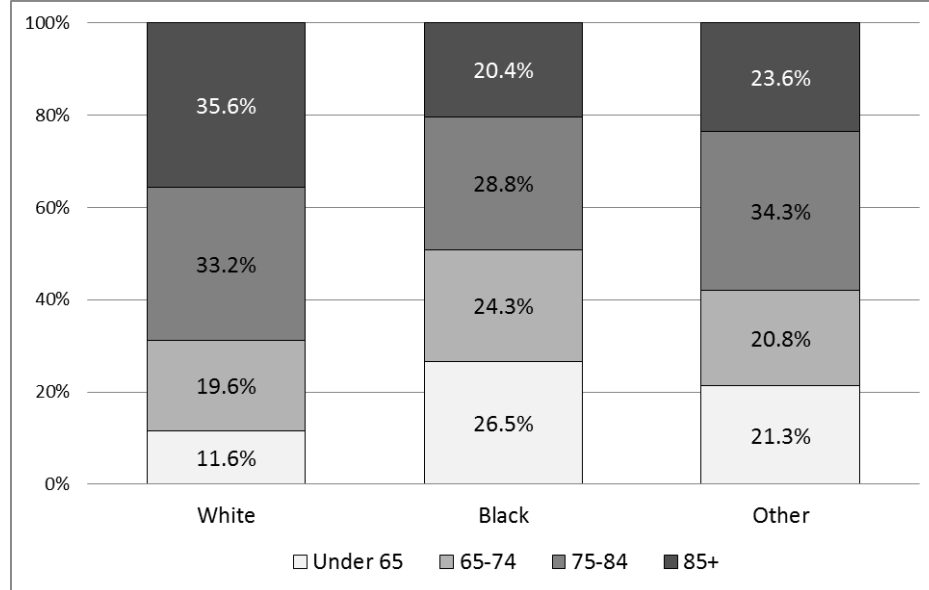

**Table 8: Percentage of Total Delaware Nursing Home Discharges, by Race and Age, 2014**

	Age Groups				
	Under 65	65-74	75-84	85+	Total Discharges (by Race)
<b>White Discharges (N=9,927)</b>	11.6%	19.6%	33.2%	35.6%	81.8%
<b>Black Discharges (N=2,025)</b>	26.5%	24.3%	28.8%	20.4%	16.7%
<b>Other Discharges (N=178)</b>	21.3%	20.8%	34.3%	23.6%	1.5%
<b>Total Discharges (by Age) (N=12,130)</b>	<b>14.3%</b>	<b>20.4%</b>	<b>32.5%</b>	<b>32.9%</b>	<b>100.0%</b>

The age breakdown among white, black, and other race patients discharged from Delaware nursing homes in 2014 is similar to that among nursing home admissions. Black patients and patients of other races discharged from Delaware nursing homes represent an overall younger population. Approximately 27 percent of black patients and 21 percent of patients of other races discharged from nursing homes were under the age of 65, whereas only 11.6 percent of white patients discharged from Delaware nursing homes fell into this youngest age category. In 2014, nearly 51 percent of black patients discharged from Delaware nursing

homes were under the age of 75; in comparison, 31.2 percent of white patients discharged from Delaware nursing homes were under the age of 75. In summary, while white patients accounted for substantially more nursing home discharges overall, black patients and patients of other races discharged from Delaware nursing homes represent a younger population in general.

**Figure 3: Racial Breakdown of Delaware Nursing Home Discharges, 2014, by Age**

## SOURCE OF PAYMENT

Patient payment for nursing home care varies by type of facility. In 2014, the overwhelming majority (83.4 percent) of patients in public Delaware nursing homes used Medicaid as a source of payment; among patients at private Delaware nursing homes, 57 percent paid via Medicaid. Although the percentage of private nursing home patients using Medicare has increased slowly since 2004, Medicare is still not a major payer of nursing home care in Delaware. In 2014, 19.0 percent and 0.5 percent of patients in private and public nursing homes, respectively, used Medicare as their source of payment. Just under one-fifth (19.0 percent) of private nursing home patients self-paid for their care, compared to 10.9 percent of public nursing home patients. Approximately 5 percent of patients in both public and private nursing homes used a different source of payment for their care.

Notes: NCC=New Castle County.

Weighted occupancy rates for individual facilities are calculated as the ratio of Billable Patient Days and Licensed Bed Days. Licensed Bed Days are calculated as (Number of Licensed beds (as of December of the reporting year))\*(Total days the facility was open during the reporting year). Weighted occupancy rates at county, facility type, and state levels are calculated as the ratio of Billable Patient Days (sum of each facility in the category) and Licensed Bed Days (sum of each facility in the category).

Notes: The "other" payment category includes charitable pay, partial pay, private insurance, Veterans benefits, out-of-state Medicaid, and, in some cases, patients for whom medical status was pending at admissions. Percentages reported in this table are based on end of month reports on the number of patients by source of payment.

NCC=New Castle County.
